

# HE AHA TĀU KITE? WHAT DO YOU SEE?

**Scuttles** (portholes) are the circular windows on a ship. When travelling around the world, Navy sailors see many different things.

*What might you see if you were looking through a ship's scuttle?*

**Use your imagination.** Maybe you are looking through the scuttle at somewhere very special to you. Or maybe you are travelling! You could travel somewhere you've always wanted to go, or you could travel into the past, or into the future.

**Be creative.** You can use coloured paper to make a collage; or make a picture using paints, pens or crayons.

**Share your journey.** When you are finished, tell a story about what you see through your scuttle.
